INDEX TO AUTHORS

A

ALBRECHT-BUEHLER, GUENTER. Daughter 3T3 cells. Are they mirror images of each other? 595

ALROY, JOSEPH. See PAULI, WEINSTEIN, SOBLE, and ALROY, 763

AMOS, LINDA A. Arrangement of high molecular weight associated proteins on purified mammalian brain microtubules, 642

ANDERSON, RICHARD G. W., and HEIN, CHERYL E. Distribution of anionic sites on the oviduct ciliary membrane, 482

ARNASON, BARRY G. W. See MURPHY, OGER, SAIDE, BLANCHARD, ARNASON, HOGAN, PANTAZIS, and YOUNG, 769

B

BACH, J. F. See NABARRA, CHARREIRE, CAVELLIER, and BACH, 773

BERNS, MICHAEL W., RATTNER, J. B., BRENNER, SARI, and MEREDITH, STEPHANIE. The role of the centriolar region in animal cell mitosis. A laser microbeam study, 351

–. See BRENNER, BRANCH, MEREDITH, and BERNS, 368

BLANCHARD, MURIEL H. See MURPHY, OGER, SAIDE, BLANCHARD, ARNASON, HOGAN, PANTAZIS, and YOUNG, 769

BLOUIN, ANDRÉ, BOLENDER, ROBERT P., and WEIBEL, EWALD R. The distribution of organelles and membranes between hepatocytes and nonhepatocytic cells in the rat liver parenchyma. A stereological study, 441

BOLENDER, ROBERT P. See BLOUIN, BOLENDER, and WEIBEL, 441

BOURRET, L. A. See RODAN, BOURRET, and CUTLER, 493

BRANCH, ANDREA. See BRENNER, BRANCH, MEREDITH, and BERNS, 368

BRANTON, DANIEL. See MARGARITIS, ELGSAETER, and BRANTON, 47

BREAUX, CAROL. See SCHMELL, EARLES, BREAUX, and LENNARZ, 35

BRENNER, SARI, BRANCH, ANDREA, MEREDITH, STEPHANIE, and BERNS, MICHAEL W. The absence of centrioles from spindle poles of rat kangaroo (PtK_2) cells undergoing meiotic-like reduction division in vitro, 368

–. See BERNS, RATTNER, BRENNER, and MEREDITH, 351

BREW, KEITH. See POWELL, JÄRLFORS, and BREW, 617

BURNSTOCK, GEOFFREY. See FRY, DEVINE, and BURNSTOCK, 26

C

CACHON, JEAN, CACHON, MONIQUE, TILNEY, LEWIS G., and TILNEY, MARY S. Movement generated by interactions between the dense material at the ends of microtubules and non-actin-containing microfilaments in *Sticholonche zanclea*, 314

CACHON, MONIQUE. See CACHON, CACHON, TILNEY, and TILNEY, 314

CANDE, W. ZACHEUS, LAZARIDES, ELIAS, and MCINTOSH, J. RICHARD. A comparison of the distribution of actin and tubulin in the mammalian mitotic spindle as seen by indirect immunofluorescence, 552

CARPENTIER, JEAN-LOUIS, PERRELET, ALAIN, and ORCI, LELIO. Morphological changes of the adipose cell plasma membrane during lipolysis, 104

CAVELLIER, J. F. See NABARRA, CHARREIRE, CAVELLIER, and BACH, 773

CHARREIRE, J. See NABARRA, CHARREIRE, CAVELLIER, and BACH, 773

CHIANG, KWEN-SHENG. See WILSON and CHIANG, 470

CHU, LUKE L. H., MACGREGOR, RONAL R., and COHN, DAVID V. Energy-dependent intracellular translocation of proparathormone, 1

CLAWSON, GARY A. See STUART, CLAWSON, ROTTMAN, and PATTERSON, 57

CODINGTON, JOHN F. See MILLER, HAY, and CODINGTON, 511

COHEN, STEVEN R. See TENNEKOON, COHEN, PRICE, and MCKHANN, 604

COHN, DAVID V. See CHU, MACGREGOR, and COHN, 1

COSCIA, CARMINE J. See MADYASTHA, RIDGWAY, DWYER, and COSCIA, 302

CRANE, LAURA J., and MILLER, DAVID L. Plasma protein synthesis by isolated rat hepatocytes, 11

CUTLER, L. S. See RODAN, BOURRET, and CUTLER, 493

D

DALLNER, GUSTAV. See NILSSON and DALLNER, 568

DAVIDSE, L. C., and FLACH, W. Differential binding of methyl benzimidazol-2-yl carbamate to fungal tubulin as a mechanism of resistance to this antimitotic agent in mutant strains of *Aspergillus nidulans*, 174

DAVIS, F. M. See HODGE, MANCINI, DAVIS, and HEYWOOD, 194

DEVINE, CARRICK E. See FRY, DEVINE, and BURNSTOCK, 26

DIACUMAKOS, ELAINE G. See GIULIAN and DIACUMAKOS, 86

DRUMM, JUDITH. See GERSHMAN, DRUMM, and ROSEN, 424
DWYER, JAMES G. See MADYASTHA, RIDGWAY, DWYER, and COSCIA, 302

E

EARLES, BETTY J. See SCHMELL, EARLES, BREAUX, and LENNARZ, 35
ECKERT, BARRY S., WARREN, ROBERT H., and RUBIN, ROBERT W. Structural and biochemical aspects of cell motility in amebas of *Dictyostelium discoideum*, 339
ELGSAETER, ARNLJOT. See MARGARITIS, ELGSAETER, and BRANTON, 47

F

FERTUCK, HELEN C. See SALPETER, FERTUCK, and SALPETER, 161
FEWTRELL, CLARE. See LAWSON, RAFF, GOMPERTS, FEWTRELL, and GILULA, 242
FLACH, W. See DAVIDSE and FLACH, 174
FREILICH, LAWRENCE S., LEWIS, RICHARD G., REPPUCCI, ALBERT C., JR., and SILBERT, JEREMIAH E. Galactosyl transferase of a Golgi fraction from cultured neoplastic mast cells, 655
FRY, GRETE N., DEVINE, CARRICK E., and BURNSTOCK, GEOFFREY. Freeze-fracture studies of nexuses between smooth muscle cells. Close relationship to sarcoplasmic reticulum, 26

INDEX TO SUBJECTS

A

Acanthosentis tilapiae, sperm cell, new flagellar organization type 9+n, EM, 707
ACTH, induction of ultrastructural changes, rat adrenocortical cells, 757
Actin filament polarity at myofibril assembly, chick embryo myogenic cells, EM study, 777
–, microfilament bundles, mirror images, daughter 3T3 cells, indirect immunofluorescence, 595
– and tubulin distribution, mitotic spindle of PtK_1 cells, indirect immunofluorescence and phase microscopy, 552
Adipose cell membrane, rat, morphological changes during lipolysis, light and freeze-fracture EM, 104
Adrenal gland, cat, steroid-containing secretory organelle, biochemistry and EM, 209
Albumin, cytoplasmic messenger RNA coding for, rat liver rough endoplasmic reticulum fractions, biochemistry and immunology, 726
Alga *Chlamydomonas reinhardtii*, cell cycle, temporal programming of chloroplast and cytoplasmic rRNA transcription, biochemistry, 470
– *Chlamydomonas reinhardtii*, gametes, plasma membrane fusion sites, freeze-fracture EM, 144
– *Chlamydomonas reinhardtii*, membrane particle arrays associated with basal body and contractile-vacuole secretion, freeze-fracture EM, 133
– *Chlamydomonas reinhardtii*, temperature-sensitive mutation, effect on flagellar assembly and function, cytology and EM, 67
Alveoli, lung, fetal rat, conversion of lamellar body membranes into tubular myelin, cytochemistry and transmission and high voltage EM, 260
AMP, cyclic, effect on cell motility, *Dictystelium discoideum*, biochemistry and light and EM, 339
–, dibutyryl cyclic, effects on mobility and ultrastructure, 3T3 and SV40 virus-transformed 3T3 cells, biochemistry and cytology and transmission and scanning EM, 424
Anionic site distribution, rabbit oviduct ciliary membrane, cytochemical EM, 482
– sites, strain-specific and nonstrain-specific TA3 adenocarcinoma cell surface coat, transmission and scanning EM, histochemistry and biochemistry, 511
Arbacia punctulata, eggs, surface sperm receptor, biochemistry and cytology, 35
Aspergillus nidulans mutants, differential binding of methyl benzimidazol-2-yl carbamate to tubulin, biochemistry, 174
ATP and calcium, roles in mitogen-stimulated glucose transport, rat thymocytes, biochemistry, 456

B

Bacteria *Escherichia coli*, outer membrane, ultrastructure of periodic protein layer, EM and image processing, 292
Barley *Hordeum vulgare*, chloroplast membranes, rotary replication for freeze-etch EM, 47
Basal body and contractile-vacuole secretion, membrane particle arrays associated with, *Chlamydomonas*, freeze-fracture EM, 133
Blebbing ultrastructure, phagocytosis of blebs in vivo, rat thyroid hyperplastic epithelial cells, 584
Bone marrow cells, mouse, spontaneous rosette formation, scanning and EM, 773
Brain, mammalian, microtubules, arrangement of high molecular weight associated proteins, biochemistry and EM, 642

C

Calcium and ATP, roles in mitogen-stimulated glucose transport, rat thymocytes, biochemistry, 456
– regulation, *Physarum polycephalum* caffeine-derived microplasmodia, cytology, 502
Cartilage, chick embryo, chondrocyte maturation, membrane changes in 5′-nucleotidase and adenylate cyclase, biochemistry and cytochemical EM, 493
Cat, adrenal gland, steroid-containing secretory organelle, biochemistry and EM, 209
Catharanthus roseus, vesicles, subcellular localization of cytochrome P-450-dependent monooxygenase, biochemistry and EM, 302
Cell cycle, *Chlamydomonas reinhardtii*, temporal programming of chloroplast and cytoplasmic rRNA transcription, biochemistry, 470
– cycle, HeLa S3 cells, polypeptide composition of nuclear matrix during, biochemistry and EM, 194
– cycle program of polypeptide labeling, *Chlamydomonas reinhardtii*, autoradiographic and biochemical study, 223
– surface, corneal fibroblast plasmalemma, developing chick embryo, biochemistry and freeze-fracture EM, 667
– surface properties, transmisstion and scanning EM, histochemical and biochemical differences, strain-specific and nonstrain-specific TA3 adenocarcinoma cells, 511
Cells, 3T3 mouse fibroblasts, daughter, mirror actin-bundle patterns, indirect immunofluorescence, 595
–, 3T3 and SV40 virus-transformed 3T3, effects of dibutyryl cyclic AMP on mobility and ultrastructure, biochemistry and cytology and transmission and scanning EM, 424

Cells, TA3 adenocarcinoma, strain-specific and non-strain-specific, transmission and scanning EM, histochemical and biochemical differences in cell surface properties, 511
–, adrenocortical, rat, ultrastructural changes induced by ACTH, 757
–, contact-inhibited and contact-uninhibited tumor lines, *in situ* freeze-fracture of monolayers, 763
–, epithelial, hyperplastic, rat thyroid, ultrastructure of blebbing and phagocytosis of blebs in vivo, 584
–, epithelial, rabbit mammary gland, isolation and separation procedures, light and EM, 390
–, exocrine, bovine pancreatic localization of secretory proteins, immunocytochemistry, 406
–, glioma, rat central nervous system, secretion of nerve growth factor, biological and immunological assays, 769
–, HeLa, electrical properties of intracellular compartments, physiological and light and EM study, 86
–, HeLa S3, nuclear matrix, polypeptide composition during adenovirus infection and in cell cycle phases, biochemistry and EM, 194
–, liver, rat, induction of pinocytosis by partial hepatectomy, cytochemistry and light and EM, 695
–, mast, peritoneal, rat, exocytosis during membrane fusion, immunology and cytochemical and freeze-fracture EM, 242
–, MOPC-21 myeloma, membrane-denuded nuclei, RNA transport, biochemistry and EM, 57
–, mouse bone marrow rosette-forming, scanning and EM, 773
–, myogenic, chick embryo, actin filament polarity at myofibril assembly, EM study, 777
–, neoplastic mouse mast, galactosyl transferase of Golgi fraction, biochemistry and EM, 655
–, nonhepatocytic, and hepatocytes, rat liver, distribution of organelles and membranes, stereological EM, 441
–, PtK_1, mitotic spindle, distribution of actin and tubulin, indirect immunofluorescence and phase microscopy, 552
–, rat kangaroo PtK_2 lines, meiotic-like reduction division, absence of centrioles from spindle poles, light and EM, 368
–, rat kangaroo PtK_2 lines, mitosis, role of centriolar region, laser microirradiation and EM, 351
–, sperm, *Acanthosentis tilapiae*, new flagellar organization type 9+n, EM, 707
Centriolar region, role in animal cell mitosis, laser microirradiation and EM, 351
Centrioles, absence from spindle poles, PtK_2 cells in meiotic-like reduction division, light and EM, 368
Chick embryo cartilage, chondrocyte maturation, membrane changes in 5′-nucleotidase and adenylate cyclase, biochemistry and cytochemical EM, 493
– embryo, corneal fibroblast plasmalemma, developing cell surface, biochemistry and freeze-fracture EM, 667
Chicken, smooth muscle, freeze-fracture studies of nexuses, relationship to sarcoplasmic reticulum, 26
Chlamydomonas reinhardtii, cell cycle, temporal programming of chloroplast and cytoplasmic rRNA transcription, biochemistry, 470
– *reinhardtii*, gametes, plasma membrane fusion sites, freeze-fracture EM, 144
– *reinhardtii*, membrane particle arrays associated with basal body and contractile-vacuole secretion, freeze-fracture EM, 133
– *reinhardtii*, temperature-sensitive mutations, effect on flagellar assembly and function, cytology and EM, 67
Chloroplast and cytoplasmic rRNA transcription, temporal programming of in cell cycle, *Chlamydomonas reinhardtii*, biochemistry, 470
– membranes, barley, rotary replication for freeze-etch EM, 47
Chondrocyte maturation, chick embryo cartilage, membrane changes in 5′-nucleotidase and adenylate cyclase, biochemistry and cytochemical EM, 493
Ciliary membrane, rabbit oviduct, distribution of anionic sites, cytochemical EM, 482
Colostrum and milk, bovine, enzymes of fat globule membranes, biochemistry and EM, 617
Compartments, intracellular, electrical properties of, HeLa cells, physiological and light and EM study, 86
Contractile-vacuole secretion and basal body, membrane particle arrays associated with, *Chlamydomonas*, freeze-fracture EM, 133
Cornea, chick embryo, fibroblast plasmalemma, developing cell surface, biochemistry and freeze-fracture EM, 667
CORRECTIONS, 217, 507
Cow, colostrum and milk, enzymes of fat globule membranes, biochemistry and EM, 617
–, pancreas, exocrine cells, localization of secretory protein, immunocytochemistry, 406
–, parathyroid, energy-dependent intracellular transport of proparathormone, biochemistry, 1
Cytochrome P-450-dependent monooxygenase, subcellular localization, *Catharanthus roseus* vesicles, biochemistry and EM, 302

D

Diabetes, rat, adipose cell membrane, morphological changes during lipolysis, light and freeze-fracture EM, 104
Dictystelium discoideum, cell motility, biochemistry and light and EM, 339

E

Eggs, sea urchin, surface sperm receptor, biochemistry and cytology, 35
Electrical properties of intracellular compartments, HeLa cells, physiological and light and EM study, 86
Electron microscopy, autoradiographic resolution, iodine-125, effect of heavy metal staining, 161
– microscopy, rotary replication for freeze-etching, T4 polyheads, human erythrocyte ghosts, barley chloroplast membranes, 47
Endoplasmic reticulum, rough, distribution of cytoplasmic messenger RNA's in two fractions of, rat liver, biochemistry and immunology, 726

Endoplasmic reticulum, rough, rapidly sedimenting, association with mitochondria, rat liver, biochemistry and EM, 714
– reticulum, rough, rat liver, mobility of ribosomes bound to membranes, freeze-etch and thin section EM, 530
Energy-dependent intracellular transport of proparathormone, bovine parathyroid, biochemistry, 1
Envelope, nuclear, mouse liver nuclei, characterization of by high resolution scanning and transmission EM, 118
Enzyme, cytochrome P-450-dependent monooxygenase, subcellular localization, *Catharanthus roseus* vesicles, biochemical and EM study, 302
–, galactosyl transferase of Golgi fraction, neoplastic mouse mast cells, biochemistry and EM, 655
– protein distribution, rat liver microsomal membranes, biochemistry, 568
Enzymes, adenylate cyclase and 5′-nucleotidase, membrane changes during cartilage maturation, biochemistry and cytochemical EM, 493
–, adenylate kinase, cytochrome *c* oxidase, glucose-6-phosphatase, malate dehydrogenase, and monoamine oxidase, association between rat liver mitochondria and rapidly sedimenting rough endoplasmic reticulum, biochemistry and EM, 714
–, fat globule membranes of bovine colostrum and milk, biochemistry and EM, 617
Epithelial cells, hyperplastic, rat thyroid, ultrastructure of blebbing and phagocytosis of blebs in vivo, 584
Erythrocyte ghosts, human, rotary replication for freeze-etch EM, 47
Escherichia coli, outer membrane, ultrastructure of periodic protein layer, EM and image processing, 292
Exocytosis during membrane fusion, rat peritoneal mast cells, immunology and cytochemical and freeze-fracture EM, 242

F

Factor, nerve growth, secretion by rat central nervous system glioma cells, biological and immunological assays, 769
Fat globule membranes, enzymes of, bovine colostrum and milk, biochemistry and EM, 617
Ferritin, polycationic, binding to rabbit oviduct ciliary membrane, cytochemical EM, 482
Fetus, rat, lung alveoli, conversion of lamellar body membranes into tubular myelin, cytochemistry and transmission and high voltage EM, 260
Fibroblast plasmalemma, chick embryo cornea, developing cell surface, biochemistry and freeze-fracture EM, 667
Filaments, actin, polarity at myofibril assembly, chick embryo myogenic cells, EM study, 777
Flagella, *Acanthosentis tilapiae* sperm cell, new organization type 9+n, EM, 707
–, *Chlamydomonas reinhardtii*, effect of temperature-sensitive mutations on assembly and function of, cytology and EM, 67
Freeze-fracture *in situ*, monolayer cultures of contact-inhibited and contact-uninhibited tumor cells, 763
Fungus *Aspergillus nidulans* mutants, differential binding of methyl benzimidazol-2-yl carbamate to tubulin, biochemistry, 174
Fusion sites, membrane differentiation, *Chlamydomonas reinhardtii* gametes, freeze-fracture EM, 144

G

Galactosyl transferase, fat globule membranes of bovine colostrum and milk, biochemistry and EM, 617
– transferase of, Golgi fraction, neoplastic mouse mast cells, biochemistry and EM, 655
Gamete, *Chlamydomonas reinhardtii*, plasma membrane fusion sites, freeze-fracture EM, 144
Glioma cells, rat central nervous system, secretion of nerve growth factor, biological and immunological assays, 769
Glucose transport, mitogen-stimulated, rat thymocytes, role of calcium and ATP, biochemistry, 456
Glycocalyx, rabbit oviduct ciliary membrane, distribution of anionic sites, cytochemical EM, 482
Glycoprotein, sea urchin egg surface, sperm receptor, biochemistry and cytology, 35
Golgi fraction, neoplastic mouse mast cells, galactosyl transferase, biochemistry and EM, 655
Granules, mitochondria, rat adrenocortical cells, effect of ACTH, EM study, 757
–, secretory, and membranes of, porcine pituitary, microtubule binding to, biochemistry, 380
Guinea pig, smooth muscle, freeze-fracture studies of nexuses, relationship to sarcoplasmic reticulum, 26

H

Hepatectomy, partial, induction of pinocytosis in rat hepatocytes, cytochemistry and light and EM, 695
Hepatocytes and nonhepatocytic cells, rat liver, distribution of organelles and membranes, stereological EM, 441
–, plasma protein synthesis by, role of hormones, biochemistry, 11
Hormones, insulin, cortisol, and epinephrine, effect on protein synthesis, isolated rat hepatocytes, biochemistry, 11
Human, erythrocyte ghosts, rotary replication for freeze-etch EM, 47

I

Infection, adenovirus, polypeptide composition of nuclear matrix, HeLa S3 cells, biochemistry and EM, 194
Iodine-125, effect of heavy metal staining, resolution in EM autoradiography, 161

J

Junctions, gap, rat stomach and liver, uncoupling procedures and structural changes, biochemistry and freeze-fracture EM, 628

L

Lamellar body membranes, conversion into tubular myelin, fetal rat lung alveoli, cytochemistry and transmission and high voltage EM, 260
Lamina, dense, mouse liver nuclei, characterization of by high resolution scanning and transmission EM, 118
Lipolysis, morphological changes of rat adipose cell membrane during, light and freeze-fracture EM, 104
Liver cells, rat, induction of pinocytosis by partial hepatectomy, cytochemistry and light and EM, 695
–, mouse, nucleus, characterization of nuclear envelope, pore complex, and dense lamina, high resolution scanning and transmisstion EM, 118
–, rat, gap junctions, uncoupling procedures and structural changes, biochemistry and freeze-fracture EM, 628
–, rat, hepatocytes and nonhepatocytic cells, distribution of organelles and membranes, stereological EM, 441
–, rat, microsomes, enzyme and phospholipid asymmetry in membranes, biochemistry, 568
–, rat, microsomes, mobility of ribosomes bound to membranes, freeze-etch and thin section EM, 530
–, rat, mitochondria, intramembrane particles of inner membrane, thermotropic lateral translational motion, inhibition by artificial peripheral proteins, freeze-fracture and deep etch EM, 278
–, rat, plasma protein synthesis by isolated hepatocytes, role of hormones, biochemistry, 11
–, rat, rough endoplasmic reticulum fractions, distribution of cytoplasmic messenger RNA's, biochemistry and immunology, 726
–, rat, rough endoplasmic reticulum, rapidly-sedimenting, association with mitochondria, biochemistry and EM, 714
Lung, alveoli, fetal rat, conversion of lamellar body membranes into tubular myelin, cytochemistry and transmission and high voltage EM, 260

M

Mammary gland, rabbit, epithelial cells, isolation and separation procedures, light and EM, 390
Mapping, electrical, intracellular compartments, HeLa cells, physiological and light and EM study, 86
Mast cells, peritoneal, rat, exocytosis during membrane fusion, immunology and cytochemical and freeze-fracture EM, 242
Matrix, nuclear, HeLa S3 cells, polypeptide composition during adenovirus infection and in cell cycle phases, biochemistry and EM, 194
Meiotic-like reduction division, PtK_2 cells, absence of centrioles from spindle poles, light and EM, 368
Membrane, adipose cell, rat, morphological changes during lipolysis, light and freeze-fracture EM, 104
– changes during cartilage maturation, 5′-nucleotidase and adenylate cyclase, biochemistry and cytochemical EM, 493
– fusion, exocytosis during, rat peritoneal mast cells, immunology and cytochemical and freeze-fracture EM, 242
Membrane fusion sites, *Chlamydomonas reinhardtii* gametes, freeze-fracture EM, 144
–, outer, *Escherichia coli*, ultrastructure of periodic protein layer, EM and image processing, 292
– particle arrays associated with basal body and contractile-vacuole secretion, *Chlamydomonas*, freeze-fracture EM, 133
– particles, *Tetrahymena pyriformis*, effect of temperature, freeze-fracture EM, 744
Membranes, chloroplast, barley, rotary replication for freeze-etch EM, 47
–, ciliary, rabbit oviduct, distribution of anionic sites, cytochemical EM, 482
–, fat globules, enzymes of, bovine colostrum and milk, biochemistry and EM, 617
–, inner mitochondrial, thermotropic lateral translational motion of intramembrane particles, inhibition by artificial peripheral proteins, freeze-fracture and deep etch EM, 278
–, lamellar body, conversion into tubular myelin, fetal rat lung alveoli, cytochemistry and transmission and high voltage EM, 260
–, microsomes, rat liver, enzyme and phospholipid asymmetry, biochemistry, 568
–, nuclear, role in RNA transport, MOPC-21 myeloma cells, biochemistry and EM, 57
– and organelles, distribution between rat hepatocytes and nonhepatocytic cells, stereological EM, 441
–, rat liver microsomes, mobility of ribosomes bound to, freeze-etch and thin section EM, 530
–, secretory granules, porcine pituitary, microtubule binding to, biochemistry, 380
Metals, heavy, effect in EM staining, iodine-125, autoradiographic resolution, 161
Methyl benzimidazol-2-yl carbamate, differential binding to fungal tubulin, *Aspergillus nidulans* mutants, biochemistry, 174
Microfilament bundles, actin-containing, mirror images, daughter 3T3 cells, indirect immunofluorescence, 595
Microfilaments without actin, *Sticholonche zanclea*, motion generated by interactions between microtubules and, light and scanning and transmission EM, 314
–, role in cell motility, *Dictystelium discoideum*, biochemistry and light and EM, 339
Microplasmodia, caffeine-derived, *Physarum polycephalum*, calcium regulation, cytology, 502
Microsomes, rat liver, enzyme and phospholipid asymmetry in membranes, biochemistry, 568
–, rat liver, mobility of ribosomes bound to membranes, freeze-etch and thin section EM, 530
Microtubules, binding of to porcine pituitary secretory granules and granule membranes, biochemistry, 380
–, centriolar region, role in animal cell mitosis, laser microirradiation and EM, 351
–, mammalian brain, arrangement of high molecular weight associated proteins, biochemistry and EM, 642
–, role in cell motility, *Dictyostelium discoideum*, biochemistry and light and EM, 339
–, *Sticholonche zanclea*, motion generated by interactions, between dense material of and microfilaments,

light and scanning and transmission EM, 314
Milk and colostrum, bovine, enzymes of fat globule membranes, biochemistry and EM, 617
Mirror images, daughter 3T3 cells, symmetrical actin-bundle patterns, indirect immunofluorescence, 595
Mitochondria, cytoplasmic messenger RNA coding for proteins of, rat liver rough endoplasmic reticulum fractions, biochemistry and immunology, 726
–, effect of ACTH on granules, rat adrenocortical cells, EM study, 757
–, *Physarum polycephalum*, division of nucleoids, light and EM, 687
–, rat liver, association with rapidly sedimenting rough endoplasmic reticulum, biochemistry and EM, 714
–, rat liver, intramembrane particles of inner membrane, thermotropic lateral translational motion, inhibition by artificial peripheral proteins, freeze-fracture and deep etch EM, 278
Mitogen stimulation, glucose transport in thymocytes, roles of calcium and ATP, biochemistry, 456
Mitosis, PtK_2 cells, role of centriolar region, laser microirradiation and EM, 351
Mitotic spindle, PtK_1 cells, distribution of actin and tubulin, indirect immunofluorescence and phase microscopy, 552
Mobility, 3T3 and SV40 virus-transformed cells, effect of dibutyryl cyclic AMP, biochemistry and cytology and transmission and scanning EM, 424
–, *Dictyostelium discoideum*, biochemistry and light and EM, 339
–, ribosomes bound to rat liver microsomal membranes, freeze-etch and thin section EM, 530
Monolayer cultures, contact-inhibited and contact-uninhibited tumor cells, *in situ* freeze-fracture, 763
Motion generated by interactions between microtubules and microfilaments, *Sticholonche zanclea*, light and scanning and transmission EM, 314
–, thermotropic lateral translational, intramembrane particles of inner mitochondrial membrane, inhibition by artificial peripheral proteins, freeze-fracture and deep etch EM, 278
Mouse, liver, nucleus, characterization of nuclear envelope, pore complex, and dense lamina, high resolution scanning and transmission EM, 118
–, smooth muscle, freeze-fracture studies of nexuses, relationship to sarcoplasmic reticulum, 26
Muscle, smooth, of chicken, guinea pig, mouse, and toad, freeze-fracture studies of nexuses, relationship to sarcoplasmic reticulum, 26
Myelin, tubular, conversion of lamellar body membranes into, fetal rat lung alveoli, cytochemistry and transmission and high voltage EM, 260
Myelinogenesis, rat optic nerve, autoradiography and biochemistry and light and EM, 604
Myofibril assembly, chick embryo myogenic cells, actin filament polarity, EM study, 777

N

Nerve growth factor, secretion by rat central nervous system glioma cells, biological and immunological assays, 769
Newt, dorsal root ganglia, resolution in EM autoradiography, iodine-125, effect of heavy metal staining, 161
Nexus, smooth muscle cells, relationship to sarcoplasmic reticulum, freeze-fracture EM, 26
Nuclear matrix, HeLa S3 cells, polypeptide composition during adenovirus infection and in cell cycle phases, biochemistry and EM, 194
Nucleoid division, *Physarum polycephalum* mitochondria, light and EM, 687
Nucleus, membrane-denuded, MOPC-21 myeloma cells, RNA transport, biochemistry and EM, 57
–, mouse liver, characterization of nuclear envelope, pore complex, and dense lamina, high resolution scanning and transmisstion EM, 118

O

Optic nerve, rat, myelinogenesis, autoradiography and biochemistry and light and EM, 604
Organelles and membranes, distribution between rat hepatocytes and nonhepatocytic cells, stereological EM, 441
–, secretory, steroid-containing, cat adrenal gland, biochemistry and EM, 209
Oviduct, rabbit, ciliary membrane, distribution of anionic sites, cytochemical EM, 482

P

Pancreas, exocrine cells, bovine, localization of secretory proteins, immunocytochemistry, 406
Parathyroid, bovine, energy-dependent intracellular transport of proparathormone, biochemistry, 1
Particles, intramembrane, inner mitochondrial membrane, thermotropic lateral translational motion, inhibition by artificial peripheral proteins, freeze-fracture and deep etch EM, 278
–, membrane, association with basal body and contractile-vacuole secretion, *Chlamydomonas*, freeze-fracture EM, 133
–, membranes, *Tetrahymena pyriformis*, effect of temperature, freeze-fracture EM, 744
Peptidoglycan, and periodic protein layer, outer membrane, *Escherichia coli*, EM and image processing, 292
Phagocytosis of blebs in vivo, ultrastructure of blebbing, rat thyroid hyperplastic epithelial cells, 584
Phospholipid asymmetry, rat liver microsomal membranes, biochemistry, 568
Physarum polycephalum, microplasmodia, calcium regulation, cytology, 502
– *polycephalum*, mitochondria, division of nucleoids, light and EM, 687
Pig, anterior pituitary gland, microtubule binding to secretory granules and granule membranes, biochemistry, 380
–, brain, microtubules, arrangement of high molecular weight associated proteins, biochemistry and EM, 642
Pinocytosis, induction of by partial hepatectomy, rat hepatocytes, cytochemistry and light and EM, 695
Pituitary gland, anterior, porcine, microtubule binding to secretory granules and granule membranes, biochemistry, 380

Plant *Catharanthus roseus*, vesicles, subcellular localization of cytochrome P-450-dependent monooxygenase, biochemistry and EM, 302
Plasmalemma, corneal fibroblast, chick embryo, developing cell surface, biochemistry and freeze-fracture EM, 667
Plastic resolution specimen, iodine-125, effect of heavy metal staining, EM autoradiography, 161
Polypeptide composition during adenovirus infection and cell cycle phases, HeLa S3 cell nuclear matrix, biochemistry and EM, 194
– labeling, cell cycle program of, *Chlamydomonas reinhardtii*, autoradiographic and biochemical study, 223
Pore complexes, mouse liver nuclei, characterization of by high resolution scanning and transmission EM, 118
Proparathormone, energy-dependent intracellular transport, bovine parathyroid, biochemistry, 1
Protein layer, *Escherichia coli* outer membrane, ultrastructure of, EM and image processing, 292
– synthesis, role of hormones, isolated rat hepatocytes, biochemistry, 11
Proteins, artificial peripheral, inhibition of thermotropic lateral translational motion of intramembrane particles in inner mitochondrial membrane, freeze-fracture and deep etch EM, 278
–, high molecular weight, arrangement of on mammalian brain microtubules, biochemistry and EM, 642
–, mitochondrial, cytoplasmic messenger RNA coding for, rat liver rough endoplasmic reticulum fractions, biochemistry and immunology, 726
–, secretory, localization of, bovine pancreatic exocrine cells, immunocytochemistry, 406
Protozoan *Dictyostelium discoideum*, cell motility, biochemistry and light and EM, 339
– *Stiicholonche zanclea*, microtubules and microfilaments, motion generated by interactions between, light and scanning and transmission EM, 314
– *Tetrahymena pyriformis*, membrane particles, effect of temperature, freeze-fracture EM, 744

R

Rabbit, mammary gland, epithelial cells, isolation and separation procedures, light and EM, 390
–, oviduct, ciliary membrane, distribution of anionic sites, cytochemical EM, 482
Radioactive label, [^{14}C]carboxydextran and [^{32}P]sodium phosphate, enzyme and phospholipid asymmetry, rat liver microsomal membranes, biochemistry, 568
– label, [^{14}C]methyl benzimidazol-2-yl carbamate and [^{3}H]colchicine, differential binding of MBC to fungal tubulin, *Aspergillus nidulans* mutants, biochemistry, 174
– label, [^{14}C and ^{3}H]isoleucine, [methyl-^{3}H]methylglucose, [^{3}H]concanavalin A, and [^{45}Ca], mitogen-stimulated glucose transport, rat thymocytes, roles of calcium and ATP, biochemistry, 456
– label, [^{14}C and ^{3}H]thymidine, [^{3}H]uridine, RNA transport in membrane-denuded nuclei, MOPC-21 myeloma cells, biochemistry and EM, 57
Radioactive label, [*carboxyl*-^{14}C]inulin, [^{14}C]leucine, and [^{3}H]thymidine, rabbit mammary gland epithelial cells, isolation and separation procedures, light and EM study, 390
– label, ^{3}H-amino acids, [^{3}H]glucosamine, and [^{32}P]orthophosphate, nuclear matrix, HeLa S3 cells, polypeptide composition during adenovirus infection and in cell cycle phases, biochemistry and EM, 194
– label, [^{3}H]arginine and [^{35}S]sulfate, cell cycle program of polypeptide labeling, *Chlamydomonas reinhardtii*, autoradiographic and biochemical study, 223
– label, [^{3}H]cAMP, [^{3}H]5′AMP, and [^{32}P]ATP, membrane changes during cartilage maturation, 5′-nucleotidase and adenylate cyclase, biochemistry and cytochemical EM, 493
– label, [^{3}H]colchicine and [^{125}I]sodium iodide, binding of microtubules to porcine pituitary secretory granules and granule membranes, biochemistry, 380
– label, [^{3}H]geraniol, subcellular localization of cytochrome P-450-dependent monooxygenase, *Catharanthus roseus* vesicles, biochemical and EM study, 302
– label, [^{3}H]glucosamine and [^{3}H]proline, chick embryo corneal fibroblast plasmalemma, developing cell surface, biochemistry and freeze-fracture EM, 667
– label, [^{3}H]leucine, galactosyl transferase of Golgi fraction, neoplastic mouse mast cells, biochemistry and FM, 655
– label, [^{3}H]leucine or [^{3}H]valine, plasma protein synthesis, role of hormones, isolated rat hepatocytes, biochemistry, 11
– label, [^{3}H]polyU and [^{35}S]methionine, distribution of cytoplasmic messenger RNA's in fractions of rat liver rough endoplasmic reticulum, biochemistry and immmunology, 726
– label, [^{3}H]thymidine, effects of dibutyryl cyclic AMP on mobility and ultrastructure, 3T3 and SV40 virus-transformed 3T3 cells, biochemistry and cytology and transmission and scanning EM, 424
– label, [^{3}H]tryptamine and [^{35}S]methionine, rapidly sedimenting rough endoplasmic reticulum, association with mitochondria, rat liver, biochemical and EM, 714
– label, [^{125}I], use of iodine-125 and heavy metal staining, resolution in EM autoradiography, 161
– label, [^{32}P]phosphoric acid, *Chlamydomonas reinhardtii* cell cycle, temporal programming of chloroplast and cytoplasmic rRNA transcription, biochemistry, 470
– label, [^{35}S]sodium sulfate and [^{35}S]phosphadenosine phosphosulfate, myelinogenesis in rat optic nerve, autoradiography and biochemistry and light and EM, 604
Rat, adipose cell membrane, morphological changes during lipolysis, light and freeze-fracture EM, 104
–, fetal, lung alveoli, conversion of lamellar body membranes into tubular myelin, cytochemistry and transmission and high voltage EM, 260

Rat, hepatocytes, induction of pinocytosis by partial hepatectomy, cytochemistry and light and EM, 695
–, liver, hepatocytes and nonhepatocytic cells, distribution of organelles and membranes, stereological EM, 441
–, liver, microsomes, enzyme and phospholipid asymmetry in membranes, biochemistry, 568
–, liver, microsomes, mobility of ribosomes bound to membranes, freeze-etch and thin-section EM, 530
–, liver, mitochondria, intramembrane particles of inner membrane, thermotropic lateral translational motion, inhibition by artificial peripheral proteins, freeze-fracture and deep etch EM, 278
–, liver, plasma protein synthesis by isolated hepatocytes, role of hormones, biochemistry, 11
–, liver, rough endoplasmic reticulum fractions, distribution of cytoplasmic messenger RNA's, biochemistry and immunology, 726
–, liver, rough endoplasmic reticulum, rapidly sedimenting association with mitochondria, biochemistry and EM, 714
–, optic nerve myelinogenesis, autoradiography and biochemistry and light and EM, 604
–, peritoneal mast cells, exocytosis during membrane fusion, immunology and cytochemical and freeze-fracture EM, 242
–, stomach and liver, gap junctions, uncoupling procedures and structural changes, biochemistry and freeze-fracture EM, 628
–, thymocytes, mitogen-stimulated glucose transport, role of calcium and ATP, biochemistry, 456
–, thyroid, hyperplastic epithelial cells, ultrastructure of blebbing and phagocytosis of blebs in vivo, 584
Reduction division, meiotic-like, PtK_2 cells, absence of centrioles from spindle poles, light and EM, 368
RNA, messenger, cytoplasmic, coding for albumin and mitochondrial proteins, distribution in rat liver rough endoplasmic reticulum fractions, biochemistry and immunology, 726
–, ribosomal, cytoplasmic and chloroplast, temporal programming of transcription, *Chlamydomonas reinhardtii* cell cycle, biochemistry, 470
– transport in membrane-denuded nuclei, MOPC-21 myeloma cells, biochemistry and EM, 57
Rosette formation, mouse bone marrow cells, scanning and EM, 773
Rotary replication, T4 polyheads, human erythrocyte ghosts, and barley chloroplast membranes, freeze-etch EM, 47

S

Sarcoplasmic reticulum and nexuses, smooth muscle cells, freeze-fracture EM, 26
Sea urchin *Arbacia punctulata*, eggs, surface sperm receptor, biochemistry and cytology, 35
Slime mold *Physarum polycephalum*, microplasmodia, calcium regulation, cytology, 502
– mold *Physarum polycephalum*, mitochondria, division of nucleoids, light and EM, 687
Sperm cell, *Acanthosentis tilapiae*, new flagellar organization type 9+n, EM, 707
– receptor, sea urchin egg surface, biochemistry and cytology, 35
Spindle, mitotic, PtK_1 cells, distribution of actin and tubulin, indirect immunofluorescence and phase microscopy, 552
– poles, absence of centrioles, PtK_2 cells in meiotic-like reduction division, light and EM, 368
Steroid-containing secretory organelle, cat adrenal gland, biochemistry and EM, 209
Sticholonche zanclea, motion generated by interactions between dense material of and microfilaments, light and scanning and transmission EM, 314
Stomach, rat, gap junctions, uncoupling procedures and structural changes, biochemistry and freeze-fracture EM, 628
Surface, cell, corneal fibroblast plasmalemma, developing chick embryo, biochemistry and freeze-fracture EM, 667
– coat properties, transmission and scanning EM, histochemical and biochemical differences, strain-specific and nonstrain-specific TA3 adenocarcinoma cells, 511
–, sea urchin eggs, sperm receptor, biochemistry and cytology, 35

T

T4 polyheads, rotary replication for freeze-etch EM, 47
Temperature, effect on membrane particles, *Tetrahymena pyriformis*, freeze-fracture EM, 744
Temperature-sensitive mutations, *Chlamydomonas reinhardtii*, effect on flagellar assembly and function, cytology and EM, 67
Tetrahymena pyriformis, membrane particles, effect of temperature, freeze-fracture EM, 744
Thymocytes, rat, mitogen-stimulated glucose transport, role of calcium and ATP, biochemistry, 456
Thyroid, rat, hyperplastic epithelial cells, ultrastructure of blebbing and phagocytosis of blebs in vivo, 584
Tissue culture, contact-inhibited and contact-uninhibited tumor cells, in situ freeze-fracture of monolayers, 763
– culture, glioma cells, rat central nervous system, secretion of nerve growth factor, biological and immunological assays, 769
– culture, rat adrenocortical cells, ultrastructural changes induced by ACTH, 757
Toad, smooth muscle, freeze-fracture studies of nexuses, relationship to sarcoplasmic reticulum, 26
Transcription, chloroplast and cytoplasmic rRNA, temporal programming of, *Chlamydomonas reinhardtii* cell cycle, biochemistry, 470
Transport of proparathormone, energy-dependent intracellular, bovine parathyroid, biochemistry, 1
Tubulin and actin distribution, mitotic spindle of PtK_1 cells, indirect immunofluorescence and phase microscopy, 552

Tubulin, fungal, differential binding of methyl benzimidazol-2-yl carbamate, *Aspergillus nidulans* mutants, biochemistry, 174

U

Uncoupling procedures, structural changes of gap junctions, rat stomach and liver, biochemistry and freeze-fracture EM, 628

V

Vesicles, *Catharanthus roseus*, subcellular localization of cytochrome P-450-dependent monooxygenase, biochemistry and EM, 302
